# BERNARD JULÉMONT

## CLOCKMAKER

# ABOUT US

Bernard Julémont began his watchmaking career at IWC–Porsche Design in 1992. In 1996, he was the youngest importer for Dubey&Schaldenbrand. He was also a representative for Oris watches. In 2001, he created alone the brand Raidillon, which he preferred to leave and resell in 2014. He is passionate about design, architecture, art deco, Scandinavian furniture, and beautiful car bodyworks. He likes to revisit curves, redefine sharp edges, in order to propose different watches. He is a lover of the original object made in small series.

## Watch & Collection

The collection is called « Dome ». It is currently composed of 10 models. The case is barrel-shaped, with an asymmetrically curved sapphire crystal. The different versions are made of steel, some of them covered with PVD.

## Phylosophy & Belgian design without compromise

Julémont-Watches leaves no one indifferent. They are bold and elegant, sensual. Made with character. They break codes and redefine curves. Because you're not a number, you'll love to wear a watch made in limited series, with a fresh, distinctive look.

## Vision & Designing innovative products

The crown is integrated so that it is flush. Its asymmetrical shape follows the curves and the size of the case. At the same time it is protected. A true emblem of this original model is the bold cut-out of the sapphire crystal between 11 o'clock and 1 o'clock that accentuates the legibility of the "power reserve" function.

## Eco-responsible approach

The strap is made of recyclable rubber. The case is made of MDF, recycled wood. The watch movement is automatic, therefore without batteries. The "power reserve" function works with the energy of your movements. The hand at 12 o'clock is a gauge indicating the remaining energy. Thanks to this option, you can keep track of your energy every day.

## Confort & Portability

This real curve goes under the cuff of a shirt. Its ergonomic shape prolonged by its rounded horns, adapts to all wrists, with great comfort. The rubber strap is made in Italy. It is washable and is recyclable.

## Differentiation Don't be like anyone else if you want to be someone.

Because they are different, Julémont watches are for strong personalities who accept difference. We support the paraglider Adem Wahbi, index 0.5 (hcp).

J1

- GLASS
- Scratch-resistant sapphire (hardness 9)
  - Hyper asymmetrical curvature
  - Anti-reflection treatment underneath
- NEEDLES
- Matt / polished faceted swords with Superluminova insert
- INDICATIONS
- Power reserve -Hours / Minutes / Seconds / Date
- CASE
- Barrel shape 42mm x 44mm
  - Steel 316L coated with PVD 800HZ
  - Water resistant 5ATM
- JAPANESE AUTOMATIC MOVEMENT
- Miyota 9100
- LIMITED EDITION
- 100 copies per dial GLASS
